
The New York State Physician's HIPAA Privacy Manual

KEY BENEFITS

- Have complete access to recommended HIPAA privacy forms used by patients and physicians
- Understand patient privacy policies and procedures under HIPAA
- Become better equipped to represent a physician's office relating to patient privacy

This title is designed to be a "hands on" tool for health care providers as well as their legal counsel. Consisting of 36 policies and procedures—as well as the forms necessary to implement them—the Manual provides the day-to-day guidance necessary to allow the physician's office to respond to routine, everyday inquiries about protected health information. It also provides the framework to enable the privacy officer and the health care provider's counsel to respond properly to even non-routine issues.

The Manual is organized in a way that parallels the various aspects of the HIPAA Privacy Rule, and incorporates pertinent New York State law considerations as well.

Co-sponsored by the New York State Bar Association's Health Law Section and the Committee on Continuing Legal Education.
