

Michael Burke

Principal
Langan Engineering and Environmental Services

Michael Burke is a Principal at Langan Engineering and Environmental Services whose practice involves site investigation and remediation, transactional due diligence, environmental site assessments, solid and hazardous waste management, in-situ remedial technology, vapor intrusion investigation and mitigation, emergency response, environmental and geotechnical site investigations, and health and safety monitoring. He specializes in remediating underutilized brownfield sites in urban environments on an expedited timeframe.

Rutgers University, M.S. Environmental Geology, 2009

Rutgers University, B.S Geological Sciences/Environmental Sciences, 1997
