

Company Description:

Iron Mountain is the global leader for storage and information management services, protecting billions of information assets. Iron Mountain's Intellectual Property Management (IPM) group offers a suite of technology escrow and IP management services to protect software licensees and developers. Law firms working with either buyers or sellers of software – or other technology – can help them reduce risk and enhance compliance by offering technology escrow as part of a comprehensive risk management strategy. As you help clients assess the risks of doing business and provide expert advice, you can turn to Iron Mountain to entrust your clients' interests to the acknowledged global leader in technology escrow and IP Development Protection services.
