SCHEDULE OF EVENTS

Program Description

Population Health – System-Wide Collaboration and Public/Private Partnerships

The Health Law Section's fall conference will address population health issues in a changing legal landscape from multiple perspectives. With a focus on the benefits of collaboration and public/private partnerships, experts from diverse fields including disaster preparedness, Medicaid/Medicare managed care, and delivery system reform (DSRIP) will discuss how this evolving area impacts the practice of health law. Representatives from government agencies, non-profits, and the private sector will also speak on the rapidly changing landscape and the expanding integration taking place in the delivery of health care.

This year's fall conference will be a valuable forum for exchanging information and ideas in navigating the complex intersections of law and healthcare. The program will be timely and relevant for attorneys representing all provider types, health systems, in-house counsel, insurance/payor plans and governmental attorneys involved in health care regulation.
