# PRACTICAL SKILLS SERIES

## GENERALLY

Adobe, Inc. has added significant new features in its Acrobat family of programs which greatly enhance the usefulness of these Practical Skills Series (PSS) forms in Portable Document Format (PDF). With these features you can:

**Use the new screen design to view information more precisely and efficiently by choosing the reading mode to fit more content on the screen or the two-up mode to view page spreads without excess space in the middle. Zoom in, pan over, or use the loupe feature in Reader to take a closer look.**

**Complete forms online as well as offline, including the ability to save partially completed forms with client data for completion later.**

**Fill in and save forms on your PC.**

***Please note that Adobe Reader Version XI (aka 11) or newer, or equivalent is required to enable efficient processing of these forms.***

The Practical Skills Series CD that you purchased from NYSBA has the authorized ability to install the current version of Reader onto your PC without connecting to the Internet or Adobe, Inc's website. If you did not exercise the option to install Reader when you installed this product, you can still perform the installation from the NYSBA CD by exiting this document, re-inserting the CD, and choosing to "INSTALL READER" when asked. No need to repeat the installation of the forms, so click CANCEL after installing the Reader program and navigate back to your Desktop.

**Be sure to check for updates to Reader that may have been issued after this CD was created.**

Below is a very brief introduction to general operations with Adobe Reader. Following that, a much more extensive discussion is provided where these and other enhanced features are explained in greater detail.

### **FILLING IN A NON-INTERACTIVE FORM**

Non-interactive PDF forms can be printed and filled in by hand or can have text inserted directly into them by way of the keyboard. At this time, Adobe is in transition regarding the entry of text into an existing PDF document and therefore provides two alternative methods, the old way as well as the new to maintain compatibility with older documents that cannot support the newer techniques.

When utilizing Reader for inserting text, one of two different situations will occur:

1. After opening a PDF document with Reader XI, you **may** see a colored ribbon across the top of the document with an icon (small picture) of a Typewriter in the center. This icon is labeled "TYPEWRITER". When you see the typewriter icon, merely click on it and the cursor will change to an I beam symbol: . ...Position this I-beam at the place where text is to be inserted, (left) click your mouse and then begin keying the material to be inserted. (Note that the other text in the original document will not expand or contract to make room for the new entry.)

- The second option you may see is when you open a PDF document with Reader and the “Typewriter” and the colored ribbon do **not** appear at the top of the document. To enter data into the document, take the following steps:

Click on the word “COMMENT” in the upper right of the screen and then on the Annotations tab, select the “T” figure from the drop-down menu by (left) clicking in it:

The cursor will change to an i-beam symbol: . ...Position this i-beam at the point where text is to be inserted, left click your mouse and begin keying the material. (Note that other text in the original document will **not** expand to make room for the new entry.)

You may also change the font and size of the new entry along with other limited options in the secondary window that automatically opens:

Some of the PDF forms in this product may contain interactive form fields that are shaded a light color. You can fill in the form with one of the tools on the Select & Zoom toolbar: the Hand  tool or the Select  tool. When you place the pointer over an interactive form field, the pointer icon changes to one of the following:

- Pointing Finger  or Pointing Hand Plus icon , appears when the pointer is over a button, radio button, check box, or item on a list.
- Arrow . Appears when you can select an item in a list of options.
- I-beam icon  appears when you can type text into the form field. If

the form fields are not interactive, the basic pointer icon does not change.

### **FILLING IN AN INTERACTIVE FORM**

- Select either the Hand tool  or the Select  tool. (Optional) To make form fields easier to identify, click the Highlight Fields button on the document message bar. Form fields appear with a colored background (light blue by default).
- Click on the first field you want to fill in, either to select that option or to place an I-beam pointer in the field so you can start typing.
- After making a selection or entering text, do any of the following:

- Press Tab or Shift + Tab to accept the field change and go to the next or previous field.
- Press the Up or Left arrow key to select the previous radio button in a group of radio buttons, or press the Down or Right arrow key to select the next radio button.
- Press Esc to reject the field change and deselect the current field. If you're viewing the form in Full Screen mode, pressing Esc a second time causes you to exit Full Screen mode.

**Note:** If the current field is a single-line text box, you can press Enter (Windows) or Return (Mac OS) to accept your typing and deselect the field. If the current field is a check box, pressing Enter or Return turns the check box on or off. In a multiline text form field, pressing Enter or Return creates a paragraph return in the same form field. In all cases, you can press Enter on the keypad to accept the change and deselect the current form field.

4. After you fill in the fields, do the following:

- Choose File > Save As, and specify a name (and location if desired) to save the completed document.

**Note:** Adobe Acrobat Reader users now have extended rights in all these documents that enable the saved copy to include the entries you made in the form.

- Print the form.

### **CLEAR UNSAVED FORM ENTRIES**

Choose File > Revert.

Note that these new features do not allow you to modify the text of the form itself, a strong advantage for PDF use where appropriate.

The following pages provide a more detailed discussion from the Reader Help File of the new features made available within the current version. Please take the time to familiarize yourself with the new procedures so that you can achieve the best possible level of time-saving and efficiency.

Additional new features supporting an open, collaborative work environment are also available. See [www.adobe.com/products/reader](http://www.adobe.com/products/reader) for details.

## Fill in forms

### Is the form fillable?

Not all forms are fillable. Sometimes form creators don't convert their PDFs to interactive *fillable* forms. Or, they intentionally design a form that you must print and fill in by hand. These non-interactive forms are called *flat* forms.

#### Purple bar across the top?

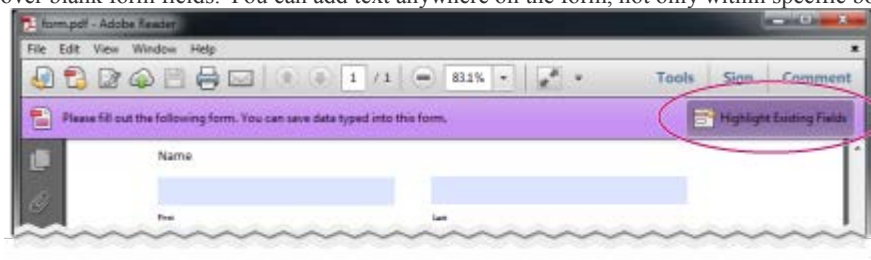

The purple message bar indicates that the form is fillable. Depending on how the form was created, it could be "interactive" or "flat".

#### Interactive form

An *interactive* form contains fields that you can select or fill in. You can turn on the Auto-Complete option to help you fill in forms more quickly.

#### Flat form with Add Text Comment tool

A *flat* form does not have interactive fields. However, if available, you can use the Add Text Comment (Typewriter) tool to type over blank form fields. You can add text anywhere on the form, not only within specific boxes.

A

B

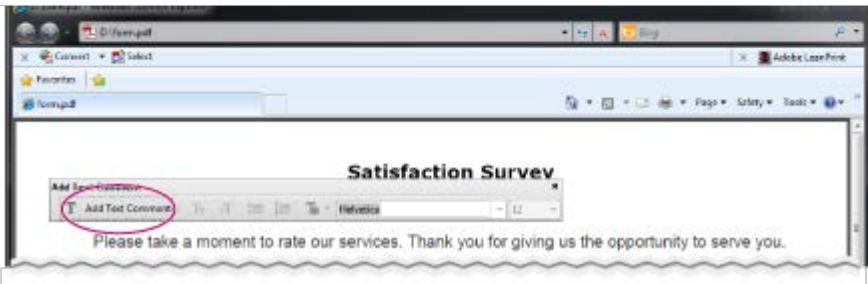

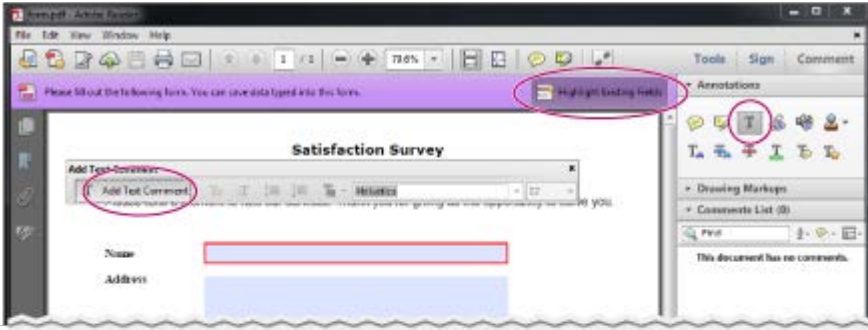

#### Fillable forms

**A.** Interactive forms highlight where you should type **B.** Forms with the Add Text Comment tool let you add text anywhere on the form  
**Note:**

The purple bar displays only if the creator of the form enabled it.

#### Add Text Comment tool visible?

Forms that display the Add Text Comment tool, let you add text anywhere on the form. If you don't see the Add Text Comment tool palette as shown below, look in the Tools or Sign pane (depending on your version of Reader) for the Add Text Comment option.

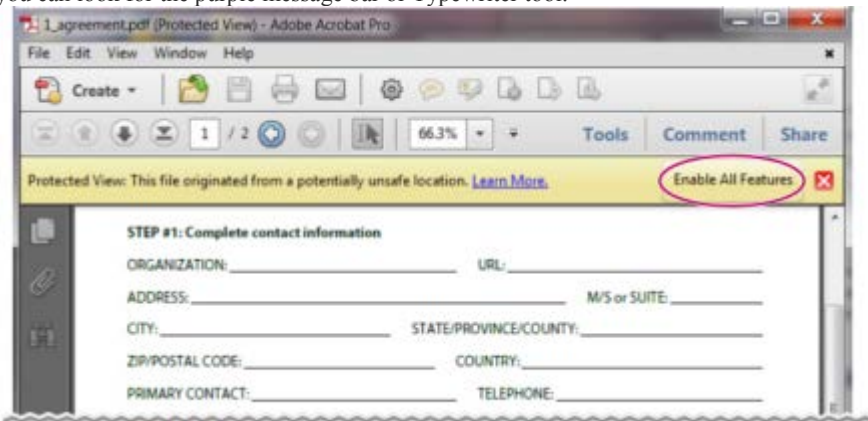

If the Add Text Comment tool is available, you can add text anywhere on the form.

**Note:**

The Add Text Comment tool is available only if the creator of the form enabled it.

**Yellow bar across the top?**

A yellow message bar may appear when you open a form in Reader. Protected View limits what you can do in a PDF to protect your computer from potentially malicious content. If you trust the source of the file, click Enable All Features. Once enabled, you can look for the purple message bar or Typewriter tool.

A yellow message bar protects you from potentially risky files.

## No purple bar or Typewriter tool?

If you don't see a purple bar across the top or the Typewriter tool, your form is not fillable in Reader. You must print the form and fill it in by hand.

Form with neither the purple bar across the top nor the Typewriter tool

## Quick tip tutorials on filling in and saving forms

For some quick tutorials on filling in forms, see these videos on Adobe TV:

- [How to enter form data using Adobe Reader](#)
- [How to type into a form](#)
- [How to save form data](#)

## Sample forms: flat and interactive

[Patti Sokol](#), of Sokol Consulting, created two sample forms to show the differences between a flat form and an interactive form. [Click here to see a flat form](#). Notice that you cannot type in the fields of a flat form. [Click here to see an interactive form](#). You can highlight the fields and type in them.

Be sure to read the information in the top text box of each sample form. Then move your cursor over the fields to see what actions are available. You can also print and save the forms to your computer.

### Fill in an interactive form

In an interactive form, the pointer changes to a different icon, depending the field. For example, the Hand  tool changes to an I-beam  when you can type text into the form field.

1. If necessary, right-click the document, and select either the Hand tool  or the Select tool  from the pop-up menu.
2. To make form fields easier to identify, click the Highlight Fields button  on the purple document message bar. Form fields appear with a colored background (light blue by default). A colored outline (red by default) identifies required form fields.
3. Click inside a text field to type. For check boxes or selection buttons, click the option you want to select.
4. Press Tab to move forward or Shift + Tab to move backward.
5. When finished, click the submit button to send the form data. The submit button can appear in the purple message bar at the top of the form or in the form itself.

For troubleshooting tips on completing forms, see [Troubleshooting forms](#).

### Options for moving among form fields

Key	Result
Tab or Shift + Tab	Accepts typing and moves to next field
Up/Left Arrow	Selects previous radio button in a group
Down/Right Arrow	Selects next radio button
Esc	Reject and deselect form field.
Esc (press twice)	Exits Full Screen mode
Enter or Return (single-line text field)	Accepts typing and deselects field
Enter or Return (multiline)	Creates paragraph return in

text field)	same form field
Enter or Return (check box)	Turns check box on or off
Enter (keypad)	Accepts typing and deselects current form field

### Enable the Auto-complete options (interactive forms only)

The Auto-Complete feature stores entries that you type in interactive form fields. Auto-Complete then suggests or even automatically enters responses that match your typing in other form fields. The suggestions appear in a pop-up menu, from which you can select a match.

The Auto-Complete feature is off by default, so you must enable it in the Forms preferences if you want to use it.

1. Choose Edit > Preferences (Windows) or Reader > Preferences (Mac OS) to open the Preferences dialog box.
2. In the Preferences dialog box, click Forms from the list at left.
3. Under Auto-Complete, choose Basic or Advanced from the menu. (A description of each mode appears at the bottom of the dialog box.)
4. Select Remember Numerical Data if you want to store numbers that you type into forms.

### Remove entries from the Auto-Complete memory

If Auto-Complete includes unwanted entries, such as inadvertent misspellings, you can remove them.

1. Choose Edit > Preferences (Windows) or Reader > Preferences (Mac OS) to open the Preferences dialog box.
2. In the Preferences dialog box, click Forms from the list at left.
3. Under Auto-Complete, select Edit Entry List, and then remove or change the unwanted words.

[To the top](#)

## Fill in forms with Add Text Comment tool

If the form creator enabled the Add Text Comment tool, use that tool to fill out flat forms. The text you add with the Add Text Comment tool appears in the Comments List (Comment > Comments List).

1. In either the purple message bar or floating toolbar, click Add Text Comment.
 

**Note:**  
*If the Add Text Comment option is unavailable, you must print the form to fill it out.*
2. Click a blank form field and type.
3. (Optional) Adjust options in the purple message bar or floating toolbar to change the text size, position, or font.
4. When finished, print a copy of the completed form.

**Note:**

*You cannot electronically submit a form filled out using the Add Text Comment tool. You must print the completed form.*

## Save forms

Not all forms can be saved. Completed forms can be saved only if the author of the form allows it. If the PDF author has enabled local saving, click the disk icon  in the toolbar at the upper left of the window or in the floating toolbar if viewing the form on the web. Then rename the file and save the form with your information.

*The purple bar displays information, if you can save data typed into this form.*

*Floating toolbar in form viewed on the web.*

When you open a form in Adobe Reader, you can view the usage rights in the notification bar above the form. Contact the author of the form to change your usage rights.

---

## Print forms

1. In the upper left of the window, click the Print button .
2. Choose a printer from the menu at the top of the Print dialog box.
3. In the Comments And Forms menu in the upper-right area of the Print dialog box, choose one of the following:
  - A. To print the form and the typed entries, choose Document.
  - B. To print the form, the typed entries, and any comments on the form, choose Document And Markups.

---

## Clear forms

### Clear a form in a browser

- Do either of the following:
- Select the reset form button, if one exists. You cannot undo this action.
- Quit the browser, and start again.

**Note:**

*Clicking the web browser's Reload or Refresh button, the Back or Go Back button, or following a link to another page may not completely clear the form.*

### Clear a form in the Reader application

- Choose File > Revert.

---

## Import or export form data (Reader application only, not browser)

In some workflows, individuals submit filled-in forms as data-only files in a format such as FDF or XML. In Reader, you can import the data to view it in the context of the complete PDF:

- In the upper right of the window, click Extended, and then click Import Data.

Likewise, you can save the information in a completed PDF form as a data file in another format:

- In the upper right of the window, click Extended, and then click Export Data.

For more information, see [Manage form data files](#) in Acrobat Help.
