Kiriaki Tourikis is an associate in Reed Smith's IP, Tech & Data Group. She has more than 15 years of experience advising, developing and implementing processes related to eDiscovery, data governance, privacy and artificial intelligence.

Kiriaki advises clients on all aspects of eDiscovery strategy and implementation, including preservation, collection, review, production and use of technology to streamline and improve eDiscovery processes. She works with clients to develop and implement eDiscovery policies and protocols, standardize and establish defensible eDiscovery strategies and approach in both civil litigation and regulatory investigations, and conduct training regarding eDiscovery best practices. Kiriaki has a particular experience in the use of TAR and data analytics to facilitate eDiscovery and other legal processes.

Previously, Kiriaki spent 6 years at JP Morgan Chase & Co. at Assistant General Counsel, first in JPMC's Litigation Department and subsequently in the Data and Privacy Legal group. In those roles, Kiriaki worked to develop the organization's eDiscovery, information governance and data disposition protocols and protocols related to data sharing and data use. Prior to JPMC, Kiraki worked at WilmerHale and Paul Weiss.

Kiriaki earned a J.D. from New York Law School, magna cum laude and received a bachelor's degree in political science, cum laude, from Barnard College, Columbia University.

Kiriaki is a frequent speaker on issues related to electronic discovery, machine learning and artificial intelligence.
