

Food Law Committee
Mission Statement

The purpose of this Committee is, in part, to keep the food, dietary supplement, and beverage industry and legal practitioners up to date, and provide practical advice concerning issues which are of interest to the industry. Such issues involve compliance with the Food Safety Modernization Act and its related guidelines, inter-actions with the Food and Drug Administration, Federal Trade Commission, and state agencies, and legislative developments. The Committee will also follow the recent trends in litigation involving consumer class actions, labeling claims, dietary supplements, and contamination claims, among others.

The Committee will also seek to engage members in programming and activities to contribute to the development of sound laws, policies, and regulations concerning the food and beverage industry, including dietary supplements. These activities will provide members with opportunities to network with colleagues on the committee and with relevant external organizations and individuals.
